PROFILE

Medior software developer with over five years of experience with cutting-edge technologies in web and desktop development, and with experience in mobile development. Open to work remotely or in-office.

Proficient in problem-solving and coding, always dedicated to every task. Devoted to obtaining new skills and eager to learn new technologies to become a better developer.

WORK EXPERIENCE

2016
2018

Full-Stack web developer

uninp.edu.rs / International University | Novi Pazar / July 2016 - November 2018

This is a project for Private University in Serbia, Novi Pazar. Working in a team of three developers, developing and maintaining University web applications as well as system automation. The core of the project is based on Python-Django and Django-REST frameworks. Moreover used Java and standard web technologies HTML5, CSS(Bootstrap 3,4), JS(Angular). Role: Full-stack web developer, Linux-Windows-macOS system administrator.

2016
2018

Teaching assistant

d.uninp.edu.rs / International University | Novi Pazar / October 2016 - November 2018

Taught students the basics of programming as well as advanced programming. Worked with network libraries and equipment. Used online collaboration tools like GitHub etc. At the end of the semester, students are capable for work in a team or as an independent developer.

2017
2018

Full-Stack web developer

cdbamericanshaman.com / GetLeadsFast LLC | California (home-based)
December 2017 - December 2018

Participate in a team of 20 members. Used Slack for everyday communication and Bitbucket for a coding commitment. The main project objective was to develop and maintain a poll application for product improvements. We used the PHP-Laravel 4.3 and the PhpStorm. This is an American(Californian) eCommerce project.

2018
2022

Full-Stack web developer

rozaje.me/ Opstina Rozaje | Rozaje - Montenegro / February 2018 - February 2022

Started as a small web application for the municipality. Nowadays is a fully working web app with the CRUD ability. The rozaje.me web app contains all of the information about events, news, and all activities from the local administration. The web app consists of a two-part. One is created using WordPress CMS and the second is developed in PHP-Laravel.

2019
ongoing

Full-Stack web developer, Software Developer

mesihat.org / Muftijstvo Sandzacko | Novi Pazar - Rozaje / November 2019 - ongoing

Started as a full-stack web developer and nowadays as a software developer in a dynamic environment, the main objective, and challenging part is to create a web/mobile and a desktop application. Many of the projects were based on Python- Django, PHP-Laravel, TypeScript, MongoDB, Firebase-Firestore. Currently working on projects like Information systems, e-commerce web, and mobile apps, web portals. Some of these projects are still ongoing <https://muftijstvosandzacko.test>, <https://tvojatrgovina.test>

2020
ongoing

Software Developer

globeabc.com / GlobeAbc | Rozaje / October 2020 - ongoing

Working in a team of six members, we created and still creating an application for online teaching. Used Laravel as the core of the app, through the Angular and Vanila JS on the frontend to the Postgre SQL and Firebase on the middleware we created fully functional app for online language teaching. We use WPS, Paypal and Stripe for payment and mixture of CMS and LMS for creating a courses and pricing pages.

2021
ongoing

Full-Stack web developer

bild-studio.net / Bild-Studio | Montenegro - Podgorica / Jun 2021 - ongoing

Mostly working on a backend side of the UNIQA insurance app as well as other web apps using PHP-Drupal / Symphony, Bsurance API for backend, and the Twig template engine for the frontend. I'm working in a team with more than twenty team members where we track and log tasks using JIRA and SLACK channel for team communication as well as Google Meet.
