## PROFILE

With a solid foundation as a medior software developer, I offer extensive experience in harnessing advanced technologies across web, desktop, and mobile platforms. My skill set is diverse, enabling me to thrive in various environments, whether working remotely or within an office. I excel in problem-solving and programming, ensuring that each task is approached with a meticulous eye for detail and a commitment to excellence. I take pride in my dedication to continuous professional growth, always seeking to refine my skills and expand my knowledge base.

My goal is to stay at the forefront of technological innovation, allowing me to contribute meaningfully to project success and maintain my edge as a proficient developer. This passion for technology and development drives my every endeavor, as I remain focused on delivering quality and pursuing new challenges that push the boundaries of what I can achieve.

## WORK EXPERIENCE

2016  
2018

### Full-Stack web developer

uninp.edu.rs / International University | Novi Pazar / July 2016 - November 2018

As an experienced Full-Stack Web Developer, I played a key role in a collaborative team for a Private University project in Serbia, Novi Pazar. Our work focused on the development and ongoing enhancement of the University's web applications and system automation. At the heart of this project were the Python-Django and Django-REST frameworks, supplemented by Java and standard web technologies including HTML5, CSS (Bootstrap 3, 4), and JavaScript (Angular). In addition to my developer role, I managed system administration across Linux, Windows, and macOS platforms.

2017  
2018

### Full-Stack web developer

cbdamericanshaman.com / GetLeadsFast LLC | California (home-based)  
December 2017 - December 2018

As a collaborative member of a 20-person team, I engaged in the development and maintenance of a polling application aimed at enhancing product features for an American eCommerce initiative based in California. Our daily coordination was streamlined through Slack, with Bitbucket serving as our repository for code commits. The project was built on the robust PHP-Laravel 4.3 framework, utilizing PhpStorm as the integrated development environment.

2018  
2022

### Full-Stack web developer

rozaje.me/ Opstina Rozaje | Rozaje - Montenegro / February 2018 - February 2022

What began as a modest web application for municipal services has evolved into a comprehensive platform, rozaje.me, with full CRUD capabilities, providing a centralized hub for events, news, and activities from the local administration. The web application is bifurcated into two integral sections: one powered by WordPress CMS for streamlined content management, and the other custom-built with PHP-Laravel for enhanced functionality and user experience.

2019  
ongoing

### Full-Stack web developer, Software Developer

mesihat.org / Muftijstvo Sandzacko | Novi Pazar - Rozaje / November 2019 - ongoing

Beginning my career as a full-stack web developer, I have progressed to the role of a software developer within a dynamic environment. My primary focus and challenge lie in the development of versatile applications across web, mobile, and desktop platforms. My project portfolio showcases a range of technologies such as Python-Django, PHP-Laravel, TypeScript, MongoDB, and Firebase-Firestore. Presently, I am engaged in developing information systems, e-commerce websites, and mobile applications, as well as expansive web portals, with several of these projects in active development phases.

2020  
ongoing

### Software Developer

globeabc.com / GlobeAbc | Rozaje / October 2020 - ongoing

As part of a six-member team, we have developed and are continuously enhancing an online language teaching application. At its core, the app is powered by Laravel, with a frontend crafted using Angular and Vanilla JS. For our database and middleware solutions, we integrate PostgreSQL and Firebase, creating a robust and fully functional platform. To facilitate payments, we've incorporated services like WPS, PayPal, and Stripe, and we utilize a blend of CMS and LMS systems to design and manage course content and pricing structures.

2021  
ongoing

### Full-Stack web developer

bild-studio.net / Bild-Studio | Montenegro - Podgorica / Jun 2021 - ongoing

As a backend specialist, my focus has been on developing the UNIQA insurance application and various other web applications, utilizing PHP with Drupal/Symfony frameworks and integrating Bsurance API. For the frontend, I employ the Twig templating engine. Collaborating within a team of over twenty members, we effectively track and manage our tasks through JIRA, maintain active communication via a dedicated SLACK channel, and conduct meetings and discussions using Google Meet.

## TECHNICAL SKILLS

- Python-Django-Flask/REST
- PHP-Laravel
- TypeScript/Angular
- SQL/Firebase/Mongo
- C/C++/Java/Swift/GoLang
- JavaScript

## Code editors and environments

- Visual Code Studio
- JetBrains
- Sublime Text
- IntelliJ IDEA
- Android Studio
- XCode
