PROFILE

With a strong background as a mid-level software developer, I have extensive experience in leveraging advanced technologies across various platforms. My diverse skill set allows me to thrive in remote or office environments. I excel in problem-solving and programming, ensuring meticulous attention to detail and excellence. I actively seek continuous professional growth to refine my skills and expand my knowledge base.

My goal is to stay at the forefront of technological innovation, contributing meaningfully to project success and maintaining my proficiency as a developer. This passion drives me to deliver exceptional results and pursue new challenges that expand my capabilities.

WORK EXPERIENCE

2016 2018

Full-Stack web developer
uninp.edu.rs / International University | Novi Pazar / July 2016 - November 2018

As a seasoned Full-Stack Web Developer, I contributed to a collaborative team developing and enhancing the University's web applications and system automation for Novi Pazar University in Serbia. We used Python-Django, Django-REST, Java, HTML5, CSS (Bootstrap 3, 4), and JavaScript/Typescript (Angular). I also managed system administration across Linux, Windows, and macOS platforms.

2017 2018

Full-Stack web developer
cbdamericanshaman.com / GetLeadsFast LLC | California (home-based)
December 2017 - Decmber 2018

As a team member, I developed and maintained a polling app for an American e-commerce initiative in California. We used Slack for daily coordination and Bitbucket for code commits. The project was built on PHP-Laravel 4.3 with PhpStorm as the IDE.

2018 ongoing

Full-Stack web developer
rozaje.me/ Opstina Rozaje | Rozaje - Montenegro / February 2018 - ongoing

Rozaje.me, initially a rudimentary web application for municipal services, has evolved into a comprehensive platform with full CRUD capabilities. It serves as a centralized hub for accessing local events, news, and activities. The application is divided into two sections: WordPress CMS for content management and PHP-Laravel for enhanced functionality and user experience.

2019 ongoing

Full-Stack web developer, Software Developer
vakufmape.org / Muftijstvo Sandzacko | Novi Pazar - Rozaje / November 2019 - ongoing

In my career as a full-stack web developer, I've transitioned to a software developer role. My focus is on developing versatile applications across web, mobile, and desktop platforms. My project portfolio showcases diverse technologies like Python - Django, PHP-Laravel, TypeScript - Angular, and Firebase. I'm currently involved in developing information systems, e-commerce websites, mobile applications, and expansive web portals. Many of these projects are in active development.

2020 ongoing

Software Developer
globeabc.com / GlobeAbc | Rozaje / October 2020 - ongoing

We've developed and continuously improved an online language teaching app powered by Laravel. The frontend is built with Angular and Vanilla JavaScript. We integrate PostgreSQL and Firebase for the database and middleware. To handle payments, we use WPS, PayPal, and Stripe. We also use CMS and LMS to design and manage course content and pricing.

2021 2022

Full-Stack web developer
bild-studio.net / Bild-Studio | Montenegro - Podgorica / Jun 2021 - January 2022

As a backend specialist, I've developed the UNIQA insurance application and other web apps using PHP, Drupal/Symfony frameworks, and the Bsurance API. I've also used Twig templating for the frontend. We collaborate effectively through JIRA, Slack, Google Meet, and regular meetings.

TECHNICAL SKILLS

Python-Django/Flask/REST	PHP-Laravel
NextJS/React/Angular	SQL/Firebase/Mongo
C/C++/Java/Swift/GoLang	Wordpress/Drupal

Code editors and environments

Visual Code Studio   JetBrains   IntelliJ IDEA

Sublime Text   Android Studio   XCode
